

## Albert Einstein

Albert Einstein was born on March 14, 1879 in Ulm, Germany. From a young age, he loved asking questions about how the world worked. He was curious about light, *space* and time. Einstein didn't speak much until he was 4 or 5, but he loved *science*. He also loved solving puzzles and thinking about strange ideas.

Einstein is best known for his **theory of relativity**, which changed how people understand space and time.

Einstein worked as a teacher and a scientist, and he wrote many important papers. In 1921, he won the **Nobel Prize** in *Physics* for his work on light and energy.

Einstein was also a kind and funny person. He loved playing the violin and often played music to relax. When he got together with friends, he liked sharing jokes and funny stories. He also really enjoyed *sailing*, but he wasn't very good at it!

Although Einstein was a very famous man, he lived a simple life. He wore old clothes, didn't like *socks*, and enjoyed taking walks while thinking about science.

Albert Einstein died on April 18, 1955, in the United States. Today, he is remembered as one of the smartest and most *creative* scientists who ever lived. People around the world still study his ideas and celebrate his love of learning.

## Muh Sheng Museum of Entomology

How do you feel when you think about insects? Are you *scared*? Are you curious? If you want to learn more about them, you can visit the Muh Sheng Museum of Entomology! This museum has one of the biggest collections of butterflies and *bugs* in the world. The museum is not dark or *creepy*. It has fun activities to help you understand insects better. It's a great place for an exciting learning adventure!

On the second floor, an interesting room is filled with lots of amazing insects from around the world. The ones in this room are rare and special. You can see the most *poisonous* butterfly, a butterfly that looks like an owl, and even a butterfly that can pretend to be a dead *leaf*! You can also learn about the biggest butterfly and the strongest *beetle*! There are so many cool and strange insects to see!

*Besides* looking at insects, you can see and do other things at the museum. You can enjoy a delicious drink or snack at the Butterfly Town Café. Young visitors will love the playground where they can run and play! Don't forget to visit the gift shop for fun gifts! You can even make special crafts in the DIY classroom.

Muh Sheng Museum of Entomology is a great place for families to explore, learn and make happy memories together!

## The Man, the Boy and the Donkey

One day, a man and his son were walking to town with their donkey.

"Father," said the boy, "It is a long way to town. Can't I ride the donkey?"

"Sure, you can," the father answered. He *lifted* his son and put him on the donkey. And they went on their way.

Soon they passed some people. "Look at that *lazy* boy!" one man said. "He rides, and his poor father walks."

The father *frowned*. "People are saying bad things about you. Maybe I should ride."

"All right," said the boy.

The father put his son on the *ground* and climbed on the donkey. They went on their way.

After a while, they heard more *voices*.

"Shame!" cried a woman. "That strong man rides, and the child walks."

The father frowned again. "We cannot please them." He lifted the boy up so that they both rode the donkey.

But another woman saw and cried, "How mean! That poor donkey is carrying too much."

"What should we do?" asked the boy.

"Perhaps we should both walk," said the father. They got off and *led* the donkey.

People laughed. One man said, "Stupid people! You have a donkey, yet you both walk."

The father frowned again and said, "See, my son, we can't please everyone. We should just decide the right thing and do it."
